

Document 12: Natural Intellects Control Center UI + Admin Dashboard Figma Specification

Project: Natural Intellects Platform Control System

Version: 1.0

Status: Draft

Purpose:

This document defines the full UI/UX structure, screen hierarchy, dashboard layouts, and Figma design blueprint for the **Natural Intellects Control Center**.

This is the internal system used to:

- Manage all schools
- Control subscriptions
- Enable/disable features
- Monitor system health
- Handle billing
- Support clients
- Deploy updates globally

It is the **highest-level system in the entire architecture**.

TABLE OF CONTENTS

1. Control Center Design Philosophy
2. System Roles
3. Global Layout Structure
4. Main Dashboard Overview
5. Schools Management Module
6. Feature Flag Management Module
7. Subscription & Billing Module
8. Analytics & Monitoring Module
9. Support & Tickets Module

10. System Configuration Module
 11. Deployment Control Module
 12. Figma Page Structure
 13. Component System for Control Center
 14. Critical UX Rules
 15. Security Design Considerations
-

1. CONTROL CENTER DESIGN PHILOSOPHY

The Control Center is NOT a school system.

It is:

A command system for managing all deployed school instances.

Core Principles

- High information density (not simplified like school UI)
 - Speed over simplicity
 - Precision control over usability for beginners
 - Operator-focused interface
 - Admin-grade system design
-

2. SYSTEM ROLES

Super Admin (Owner Level)

Full control over:

- All schools
 - Features
 - Pricing
 - System deployments
-

Support Admin

Handles:

- Tickets
 - Customer issues
 - Onboarding help
-

Finance Admin

Handles:

- Subscriptions
 - Payments
 - Revenue tracking
-

Technical Admin

Handles:

- System health
 - Deployments
 - Feature registry
-

3. GLOBAL LAYOUT STRUCTURE

Desktop Layout

Left Sidebar (Primary Navigation)

``text id="nav1" Dashboard Schools Features Subscriptions Billing Analytics Support Deployments Settings

Top Bar

Includes:

- Global search (school, feature, invoice)
- Notifications
- System status indicator
- Admin profile

Main Workspace

Dynamic content area depending on module

Design Note

This system is NOT mobile-first.

It is:

- Desktop-first
- High resolution optimized
- Admin workstation oriented

4. MAIN DASHBOARD OVERVIEW

CC-001: Global Dashboard

Key Metrics Cards

- Total Schools
- Active Schools
- Monthly Revenue
- Active Subscriptions
- Feature Usage Rate
- System Health Status

Live System Map

Shows:

- All active school systems
- Status indicators (green/yellow/red)
- Region-based grouping

Recent Activity Feed

- New school onboarded
- Feature upgrades
- Failed payments
- System alerts

Quick Actions

- Add School
- Enable Feature Globally
- Create Subscription Plan
- View Support Tickets

5. SCHOOLS MANAGEMENT MODULE

CC-002: Schools List Page

Table Columns

- School Name
- Location
- Subscription Plan
- Active Features
- Status
- Last Active
- Actions

Actions

- View Details
- Edit Features
- Suspend School
- Upgrade Plan

CC-003: School Detail Page

Sections

Overview Panel

- School profile
- Subscription info
- Feature set

System Usage

- Active users
- Daily logins
- Feature usage

Configuration Panel

- Feature toggles
- Plan upgrades
- Billing status

Data Snapshot

- Students count
- Teachers count
- Payments processed

6. FEATURE FLAG MANAGEMENT MODULE

CC-004: Feature Registry

Feature List Table

- Feature Name
- Feature Key
- Description
- Default Plan
- Status

CC-005: Feature Control Panel

Controls

Each feature has:

- Global enable/disable
- Per-plan assignment
- Per-school override

Example UI

```
```text id="feat1"
LIBRARY MODULE
```

Global Status: ACTIVE

Starter Plan: ✖

Pro Plan: ✔

Enterprise: ✔

Override:

St Mary's School → ENABLED

---

## CC-006: Feature Dependency Map

Shows:

- Which features depend on others
- Impact if disabled
- Risk warnings

---

# 7. SUBSCRIPTION & BILLING MODULE

---

## CC-007: Subscription Overview

---

### Metrics

- Active subscriptions

- Monthly recurring revenue
- Churn rate
- Trial conversions

---

## CC-008: Plan Management

---

### Plan Editor

- Create plan
- Edit pricing
- Assign features

---

### Plan Example

```text id="planx" Starter - \$X

Includes: - Students - Attendance - Fees

```
---

## CC-009: Invoice Management

---

- Invoice list
- Payment status
- Download invoices
- Manual adjustments

---

# 8. ANALYTICS & MONITORING MODULE

---

## CC-010: System Analytics Dashboard

---

### Metrics

- Feature usage per school
- Most used modules
- Underused features
- Revenue per feature
```

CC-011: School Behavior Analytics

- Login frequency
- Active users per school
- Feature engagement rate

CC-012: System Health Monitor

- API latency
- Server uptime
- Error logs
- Database performance

9. SUPPORT & TICKETS MODULE

CC-013: Ticket Dashboard

- Open tickets
- Resolved tickets
- Priority levels

CC-014: Ticket Detail View

- Issue description
- School context
- Logs
- Response thread

CC-015: Live Support Console

- Chat system
- Remote diagnostics
- Feature toggles for troubleshooting

10. SYSTEM CONFIGURATION MODULE

CC-016: Global Settings

- System branding
- API keys
- Email configurations
- SMS providers

CC-017: Role Management

- Admin roles
- Permissions matrix

CC-018: Audit Logs Viewer

- All system actions
- Filters by user, school, action

11. DEPLOYMENT CONTROL MODULE

CC-019: Deployment Dashboard

Shows:

- Version history

- Active deployments
- Rollback options

CC-020: Feature Release Manager

Controls:

- Gradual rollouts
- Beta testing groups
- Feature flags by region/school

CC-021: System Update Manager

- Push updates
- Monitor deployment health
- Rollback system

12. FIGMA PAGE STRUCTURE

Recommended Figma Pages

```text id="fig1"

02 Design System

03 Global Dashboard

04 Schools Module

05 Feature Management

06 Subscription Module

07 Analytics Module

08 Support Module

09 System Settings

10 Deployment Control

11 Component Library

12 Prototypes

---

## 13. COMPONENT SYSTEM

---

### Core Components

- Data tables
- Metric cards
- Toggle switches
- Feature badges
- Status indicators
- Admin modals
- Log viewers

---

### Advanced Components

- System map visualization
- Feature dependency graph
- Revenue charts
- Live activity feed

---

## 14. CRITICAL UX RULES

---

### Speed is Priority

Every action must be:

- Instant
  - Direct
  - Minimal clicks
-

## No User Confusion

Admins are technical users, but:

- Avoid clutter overload
  - Maintain structured layouts
- 

## Safety First

No accidental:

- Feature disable globally
- School deletion
- Billing misconfigurations

Require confirmation layers.

---

# 15. SECURITY DESIGN CONSIDERATIONS

---

## Multi-layer Control

- Authentication layer
  - Role permissions layer
  - Feature access layer
  - Audit logging layer
- 

## Critical Rule

UI never controls access. Backend always enforces it.

---

# STRATEGIC CONCLUSION

The Natural Intellects Control Center is:

- The brain of the entire platform
- The revenue and feature control system
- The operational command center
- The scaling mechanism for all schools

It transforms the product from:

A school system

Into:

A managed education SaaS platform
